

Government Engineering College Valsad

Electrical Engineering Department

Report on Webinar entitled as

“Solar PV Generation and Advancement”

Dated 15-03-2021

The one-day workshop on “Solar PV Generation and Advancement” was scheduled on 15th March, 2021 by Electrical Engineering Department, Government Engineering College, Valsad under SSIP. Around 60 enthusiastic students of final year & faculties from Electrical Engineering have participated in this workshop. Workshop consists of two technical sessions for explaining theory & demonstration of Solar Power Plant installed at Institute. Both sessions were conducted by Mr. Kishan Thummar and Mr. Soham Hirpara Entrepreneurs at NAVI Energy, Surat.

Dr. V. S. Purani, Principal of Government Engineering College, Valsad has welcomed the experts and inspired students to work in the area of Solar PV Systems. Dr. K. L. Mokariya, Head of the Department, Electrical Engineering has shared his thoughts on the Solar PV Generation.

First session was started with motivation on Innovation & Research in the area of Solar PV Generation. In this session Mr. Kishan Thummar has explained about need of the Solar PV generation and Challenges in this area. At the end of the first session participants were encouraged to ask questions. Enthusiastically the participants asked the questions. Selection of the rating of power plant at home was discussed.

Second session was started with demonstrating the solar power plant installed at the institute and the troubleshooting of the power plant was explained.

At the end of workshop, Memento was presented to experts by coordinator Prof. A. N. Parmar. Vote thanks was given by the coordinator by Prof. N. I. Patel. participants shared their review, based on that we can conclude that they really enjoyed both the session of workshop.

Coordination of Students Ankit Yadav, Punit Machhi, Mayank Mahla, Kamalsingh Bhandari, Ruchit Popat and anchoring of Ankit Yadav was worth noting.
